INFORMATION ON MEASURES OF PROVIDING PAYMENT SECURITY

Upon replenishment of virtual electronic account with bank card, the processing of payment (including card number input) takes place on a secured page of the processing system, which has passed the international certification. The security of payments is guaranteed by the processing center. This means that your confidential data (card requisites, registration data and etc.) are not received to chothuesim.us, their processing is protected completely and no one, including chothuesim.us, can't get your bank card details or other data necessary for making a payment.

Upon working with card data, information protection standard is applied, which is developed by the international payment systems Visa and MasterCard-Payment Card Industry Data Security Standard (PCI DSS), which provides a secure processing of Holder's bank card requisites. The applied technology of data transmission guarantees security on transactions with bank cards by using TLS (Transport Layer Security), Verified by Visa, Secure Code, MIR Accept protocols and closed banking networks with the highest degree of protection.
